IDENTIFIERS	*California Safe Schools Assessment

ABSTRACT

The school's responsibility is to provide an effective learning environment for students to achieve academic success. The California Safe Schools Assessment (CSSA) collects data on individual incidents of school crime from all California public schools and county-operated education programs. The California Department of Education strongly discourages comparisons between or among school districts and county offices of education (COE's). This handbook presents data on school incidents reported during 1995-96 from the four major crime categories--property crimes, crimes against persons, drug and alcohol offenses, and other. Some of the highlights include the following: (1) Property crimes were the most common crimes affecting California schools, representing 34 percent of all crimes reported and an incident rate of 4.9 per 1,000 students; (2) vandalism was the most commonly reported incident in the property-crimes category with an incident rate of 1.7 per 1,000 students; (3) crimes against persons represented 28 percent of all reported crimes with an incident rate of 4.1 per 1,000 students; (4) drug and alcohol offenses represented 26 percent of all reported crimes with an incident rate of 3.8 per 1,000 students; (5) of the reported crimes against persons, 89 percent of the incidents involved no weapon; and (6) students were most often identified as the victims in the crimes-against-persons category (89 percent). Five recommendations are included. Two tables and five figures are included. Appendices contain copies of the school-crime reporting form and reference guide to crime definitions; information on grant programs for 1996-97 through the California Department of Education Safe Schools and Violence Prevention Office; and data for incident frequencies and crime rates by COE and by county. Promoting Safe Schools

Presenting the Results of the 1995-96 California Safe Schools Assessment

Publishing Information

Promoting Safe Schools: Presenting the Results of the 1995-96 California Safe Schools Assessment was developed and prepared by staff for the California Safe Schools Assessment (CSSA) Program, a partnership among Butte County Office of Education, Duerr Evaluation Resources, and the California Department of Education. CSSA staff, working with Mary Tobias Weaver, Administrator, Safe Schools and Violence Prevention Office, include the following partners: Jerry Allred, Shelton Enochs, and Anne Pace, Butte County Office of Education; Mark Duerr, Christine Hanstein, Heather Johnson, and Lynda Kleaver, Duerr Evaluation Resources; and Gail Evans and Jean L. Scott, California Department of Education.

It was published by the Butte County Office of Education, 1859 Bird St., Oroville, CA 95965. It was distributed under the provisions of the Library Distribution Act and *Government Code* Section 11096.

ISBN 0-8011-9759-7

Ordering Information

Copies of this publication are available for $10.00 each, plus shipping and handling charges. California residents are charged sales tax. Orders may be sent to the Bureau of Publications, Sales Unit, California Department of Education, P.O. Box 271, Sacramento, CA 95812-0271; FAX (916) 323-0823.

An illustrated *Educational Resources Catalog* describing publications, videos, and other instructional media available from the Department can be obtained without charge by writing to the address given above or by calling the Sales Unit at (916) 445-1260.

Notice

The guidance in this handbook is not binding on local educational agencies or other entities or persons. Except for the statutes, regulations, and court decisions that are referenced herein, this handbook is exemplary, and compliance with it is not mandatory. (See *Education Code* Section 33308.5.)

EXECUTIVE SUMMARY

Why assess school safety?

The school's responsibility is to provide an effective learning environment for students to achieve academic success. Fundamental to this responsibility is the safety and security of the school and its student population. Assessing the number and types of crimes that occur on school campuses will provide factual information for use by school personnel to create, maintain, and enhance a safe school environment. This assessment will identify monetary losses to school districts from property crimes — funds that would otherwise be used to improve students' learning environment. It will help to eliminate unnecessary exaggerations about the safety of our schools brought on by sensational accounts of isolated negative events. It will also provide important information which can be used to stimulate the involvement of students, parents, and other interested community members in safe school planning.

The California Legislature established the mechanism to assess school safety — the California Safe Schools Assessment (CSSA). Through CSSA, all public schools and county-operated education programs collect and report data on individual incidents of school crime. These data are to be used as a diagnostic and self-assessment tool by the individual school district or county office of education (COE). CSSA data also provide decision makers with information to develop effective programs and techniques to ensure the safety of our schools. In addition, it can be the catalyst for schools to develop the resources and partnerships to plan and implement prevention and intervention programs.

The California Department of Education (CDE) strongly discourages comparisons between or among school districts and COEs due to the local factors that affect crime rates, many of which may be outside the control of the schools. It is important that the CSSA data for individual school districts and COEs are viewed within the context of their surrounding communities. It may very well be that schools in districts or COEs with high incident rates are quite safe relative to their surrounding communities.

The safety of our schools as well as the education of our children is a societal obligation, not just a school responsibility. The involvement of parents and other interested community members in our schools is a necessity if we are to create and enhance a safe, positive, effective learning environment which stimulates learning and supports the educational process. CSSA is one way to get factual information to the community and encourage school/community partnerships.

What are the limitations of the first year data?

CSSA began collecting data on school incidents in July 1995. This report, therefore, is a snapshot of school incidents during 1995-96, and no longitudinal trends can be analyzed. CSSA data should not be compared to data from previous statewide school crime reporting attempts because of many important differences between the programs, including the types and definitions of incidents reported.

Data validation and verification activities also indicate that there has been a learning curve associated with the first-year implementation of this new program. As a result, not all local education agencies (LEAs) have adopted CSSA guidelines and quality control systems that assure complete and accurate reporting. Therefore, there is probably some level of underreporting evident in the data presented in this report, although information about the magnitude of the underreporting is not available. If LEAs improve their reporting accuracy in future years as would be expected from continued training and experience, data for 1996-97 may well show an increase in reported crime rates.

Also, some LEAs showing higher incident rates during this first program year may have implemented strict CSSA compliance procedures, and their higher rates may reflect this strict compliance rather than more crime incidents relative to districts which experienced a learning curve in their compliance.

What are the statewide results and recommendations of this first year?

From the four major crime categories reported through CSSA — Property Crimes, Crimes Against Persons, Drug and Alcohol Offenses, and Other — CSSA data provide the following highlights:

- Property Crimes were the most common crimes impacting California public schools, representing 34 percent of all crimes reported and an incident rate of 4.9 per 1,000 students.
- Property Crimes resulted in an economic loss of just under $22.7 million.
- *Vandalism* was the most common incident reported in the Property Crimes category with an incident rate of 1.7 per 1,000 students and represented the largest percentage (32 percent) of the total dollar loss.
- Crimes Against Persons represented 28 percent of all reported crimes with an incident rate of 4.1 per 1,000 students. The most common Crimes Against Persons incident was *Battery* representing 3.3 incidents per 1,000 students.
- Drug and Alcohol Offenses represented 26 percent of all reported crimes with an incident rate of 3.8 per 1,000 students. The most commonly reported Drug and Alcohol Offense was *Possession of Drugs* and represented 1.6 incidents per 1,000 students.
- The Other category represented 13 percent of all reported crimes with an incident rate of 1.8 per 1,000 students. In this category, *Possession of a Weapon* was the incident most reported. Of the weapons, knives were most predominant and statewide represented 0.87 incidents per 1,000 students.
- **Of the reported Crimes Against Persons, 89 percent of the incidents involved no weapon.**
- At the elementary school level, Drug and Alcohol Offenses represented the lowest incident rate per 1,000 students at 0.2. The category of Other represented the lowest incident rate per 1,000 students at the other three levels: middle/junior high school at 2.9, high school/continuation high school at 3.9, and COE programs at 1.2.

- The highest incident rate per 1,000 students reported in elementary schools was for Property Crimes at 4.0. Crimes Against Persons had the highest rate at the middle/junior high school level at 7.3, and in COE programs at 6.6. At the high school/continuation high school level, the highest rate per 1,000 students was for Drug and Alcohol Offenses at 11.1.

- The majority of students involved in perpetrating school crime were male, 61 percent, as were the majority of victims, 69 percent. Females made up 14 percent of the reported suspects, and the remaining 25 percent were incidents (primarily unwitnessed property crimes) where the gender of the persons involved was unknown by site reporters.

- Students were identified most often as being suspects in the reported incidents (67 percent) as compared to nonstudents (8 percent) or unknown suspects (25 percent).

- Students were most often identified as the victims in the Crimes Against Persons category (89 percent) as compared to certificated employees (5 percent), classified employees (3 percent) or other persons (3 percent). The ratio of student to adult victims mirrors the proportion of students and adults in California schools.

Based on this first year of data, CSSA makes the following five recommendations related to the reporting system and uses of the data:

- provide information on effective prevention and intervention programs and continue to assess the effectiveness of those programs currently being implemented throughout the public school system in California,

- provide training to school site reporters and CSSA representatives to improve their reporting procedures to ensure consistency and accuracy of the reported data,

- increase the number of validation site visits of LEAs to improve the ability to generalize the findings statewide,

- work to improve the reporting of student suspension data, and

- continue to analyze the best practices approaches to CSSA data collection and share the information through training and technical assistance.

What resources are available for school safety programs?

California and the federal government provide a variety of resources to ensure the safety of our schools. Schools, districts, and COEs are implementing many programs and techniques to address school safety. This report cites several examples of such programs. CDE looks forward to tracking the effectiveness of these approaches with longitudinal CSSA data in the coming years.

INTRODUCTION

What is CSSA?

California Safe Schools Assessment began on July 1, 1995 to provide information to policy makers in schools, districts, COEs, and state government that will help them develop an understanding of the most pressing crime and safety issues confronting students, teachers, administrators, and community members. As established by the California Legislature in statute (*Penal Code* sections 628 et seq.), a requirement of the program is the publication of an annual report to the Legislature providing a statewide summary of the information provided by local school districts and COEs. This is the first CSSA report in an annual series.

CSSA is administered by a partnership among CDE, Butte County Office of Education, and Duerr Evaluation Resources of Chico, a private evaluation firm. These three agencies provide staff to support the program at the state level. Representatives of these three agencies also form the CSSA Management Team to direct the development and implementation of the program. To assist with this process, the CSSA Management Team convened the CSSA Advisory Committee consisting of representatives of the Office of the Attorney General, Department of Finance, Office of the Legislative Analyst, Office of Child Development and Education, K-12 education associations, institutions of higher education, and LEAs from throughout the state. This committee identified and approved reportable crime categories and provided valuable insight and perspective in the design of the instruments and systems which are now in place or under development.

The development and implementation of CSSA represents an enormous undertaking. It has required the involvement of one or more individuals at each of California's more than 7,500 public schools, the commitment of a CSSA representative at each of over 1,000 school districts and COEs, and quality control and data processing for over 75,000 crime reports. The report contains data aggregated from each California school district and COE according to *Drug and Alcohol Offenses*, *Battery, Assault with a Deadly Weapon*, *Homicide*, *Robbery* and *Extortion*, *Sex Offenses*, *Possession of a Weapon*, and *Property Crimes*. (For a complete definition of terms and a copy of the reporting form, see Appendix A.)

The information gleaned from schools and programs through CSSA can provide an invaluable tool for school communities to focus partnership activities on the safety of students and staff. This first annual report provides a snapshot of safe school issues and should lead to the marshaling of resources to address those issues.

What are the limitations of the first year data?

Several limitations exist in these first year data. First, as in any new reporting requirement, there may be inaccuracies and inconsistencies in the data reported by a school district or COE. These inaccuracies or inconsistencies are typical as people learn the specifics in a data collection system; and the results should not be construed in any way as fraudulent attempts at distorting the data. Second, the data only reflect school incidents during 1995-96, and no longitudinal trends can be analyzed. Third, CDE strongly discourages comparisons between or among school districts and COEs due to the many local factors that affect crime rates, many of which may be outside the control of the schools.

SCHOOL SAFETY: RESOURCE DEVELOPMENT AND PROGRAM PLANNING

How will CSSA data be used?

CSSA data will help schools, districts, and COEs identify the most pressing safety issues confronting their school communities. When data are available, agencies then have the information needed to make wise resource allocations for safe school strategies and programs. These data can shape education strategies for all students in all schools and emphasize the importance of alternative programs and placements. CSSA data can direct and facilitate partnerships among public and community-based service agencies most identified by schools as essential to safety and well-being: law enforcement, probation, public and mental health, alcohol and drug services, social welfare, parent groups, family support agencies, and the business community. Used as a diagnostic tool for state, district, and COE decision makers, these data can be the foundation of a needs assessment for school programs and funding. Longitudinal data in future years will help LEAs, state government, and federal agencies evaluate the relative effectiveness of specific interventions and program funding.

CSSA data also provide a strong needs assessment and grant justification for schools, districts, and COEs. For example, the School/Law Enforcement Partnership, a joint program between CDE and the Office of the Attorney General, provides small matching grants to schools needing financial assistance in implementing a portion of their safe school plan. Safe school planning, a prerequisite for these grants, responds to data that assess the current status of school crime committed on school campuses and at school-related functions.

What innovative strategies and promising practices currently exist to improve school safety?

Schools and communities throughout the state are developing and implementing a variety of programs to enhance school safety and provide positive learning environments for all students. Examples of potentially promising approaches include the following:

- Lennox Middle School in Los Angeles offers a comprehensive approach which includes gang prevention activities, a Safe Haven Program with after school alternatives, a well-developed mediation strategy which is linked to instruction, and a parent education program.

- John F. Kennedy High School in Sacramento actively involves parents in the school with their Parents on Campus program. Parental involvement on campus four hours a day has influenced the attitudes and atmosphere of the school, and the school cites a reduction in the incidence of school conflict.

- David Starr Jordan Middle School in Burbank operates an After The Bell program which identifies high-risk and gang-involved students and provides them with activities to build self-esteem while performing a service project for the school. Activities include academic tutoring, sports, computers, and community connection. In addition, efforts by Burbank School District include their district-wide Outreach Project in cooperation with the Burbank Police Department and the Los Angeles Probation Department to affect behavioral problems and reduce truancy and dropouts.

- Mills Middle School in Rancho Cordova is one of the sites for the O.K. Program which stresses involvement between parents, schools, and the community. Team members work with students to monitor their grades and classroom citizenship, participate in study sessions and recreational activities, and reward students for doing well in school.

- Folsom High School in Folsom promotes cultural awareness through major events at the school, offers a safety hotline and conflict resolution program, provides group counseling sessions through a Student Assistance Program, and has increased police presence on campus through their school officer. All of these efforts have reduced the incidence of racial conflict and fights among students, established a more disciplined approach to school life, and increased the community's involvement in the school.

- Modesto City Schools in Modesto has a comprehensive partnership approach to school safety that includes an interagency safety committee at each school site, collaborative relationships between the police, probation, and the schools with two full-time police officers assigned to the school district along with a gang prevention officer who visits each campus daily, and full-service family health centers located on two campuses.

- Mt. Diablo Unified School District in Concord merged its school safety task force and its drug free task force to produce funding and support from both the Concord and Pleasant Hill Police Departments for three full-time resource officers and continuation of the DARE program. The first full-time site-based probation officer has just been established at Mt. Diablo High School. These efforts resulted in a 50 percent reduction in period cuts and a 30 percent reduction in all day truancy.

- Empressa Elementary School in Oceanside has a well-established peer mediator, intergroup relations and communication skills training program, a student leadership group, and parent involvement. The school also provides on-site mental health services through its Primary Intervention Program.

Is funding available to develop safe school programs?

The chart included in Appendix B, CDE Safe Schools and Violence Prevention Office, Safe Schools Grant Programs, 1996-97, provides resource information on the many state and federal grants that promote safe schools. Many grants (including Title IV Safe and Drug Free Schools and Communities) require safety data to assess the effectiveness of the program being funded. CSSA data will be an important measure to be used in qualifying for grants and assessing program success.

FINDINGS AND RESULTS

The results presented in this section of the report are based on incidents of reported crime submitted by 100 percent of the school districts and COEs in California during 1995-96. Data are summarized according to Property Crimes, Crimes Against Persons, Drug and Alcohol Offenses, and Other incidents of crime.

How many and what types of incidents occurred statewide?

Table 1

Total Number of Incidents Reported in California Public Schools for the 1995-96 School Year

Type of Incident	Number of Incidents	Percentage of Total Incidents
Property Crimes	**27,090**	**34%**
Arson	378	<1
Burglary	7,010	9
Graffiti	3,384	4
Theft	6,794	9
Vandalism	9,524	12
Crimes Against Persons	**22,387**	**28%**
Assault with a Deadly Weapon	1,940	2
Battery	18,097	22
Homicide	3	<1
Robbery/Extortion	1,451	2
Sex Offense	896	1
Drug and Alcohol Offenses	**20,592**	**26%**
Use of Alcohol/Drugs	7,382	9
Possession of Alcohol	1,070	1
Possession of Drugs	8,654	11
Possession of Paraphernalia	1,843	2
Possession of Alcohol/Drugs for Sale	555	1
Sale and/or Furnishing of Alcohol/Drugs	1,088	1
Other	**10,056**	**13%**
Bomb Threat	280	<1
Destructive/Explosive Devices	727	1
Loitering/Trespassing	2,371	3
Possession of Weapon(s)	6,678	8

Percentage column does not add up to 100% due to rounding.

What type of property incidents occurred?

The most common crimes impacting California public schools were those involving property. These incidents resulted in an economic loss to school districts and COEs of just under $22.7 million, or approximately $4.15 per student. This economic loss included the cost of materials, labor, and any other costs associated with the repair of the damaged property. LEAs provided these estimates prior to any compensation by insurance companies or restitution by students or their parents/guardians. Chart 1 provides a breakdown of the dollar losses by the type of property crime reported.

Chart 1

Resulting Dollar Losses to LEAs from Property Crimes on California Public School Campuses for the 1995-96 School Year

The dollar loss amounts shown in Chart 1 do not represent the total dollar losses to LEAs as a result of Property Crimes. With the exception of *Burglary*, only Property Crimes beyond specified dollar thresholds are reported as follows: *Vandalism*, *Arson*, and *Graffiti* (over $100), and *Theft* (over $50). Therefore, CSSA does not have data for those crimes that may have occurred under these specified dollar amounts.

Table 2 displays results in crime rates per 1,000 students. Converting the crime statistics to a crime rate will allow longitudinal comparisons of the data in future years by taking into account changes in student population.

What are the incident rates?

Table 2

Incident Rates of Crime in California Public Schools for the 1995-96 School Year

Type of Incident	Incident Rate per 1,000
Property Crimes	**4.9**
Arson	.1
Burglary	1.3
Graffiti	.6
Theft	1.2
Vandalism	1.7
Crimes Against Persons	**4.2**
Assault with a Deadly Weapon	.4
Battery	3.3
Homicide	<.001
Robbery/Extortion	.3
Sex Offense	.2
Drug and Alcohol Offenses	**3.8**
Use of Alcohol/Drugs	1.4
Possession of Alcohol	.2
Possession of Drugs	1.6
Possession of Paraphernalia	.3
Possession of Alcohol/Drugs for Sale	.1
Sale and/or Furnishing of Alcohol/Drugs	.2
Other	**1.8**
Bomb Threat	.1
Destructive/Explosive Devices	.1
Loitering/Trespassing	.4
Possession of Weapon(s)	1.2

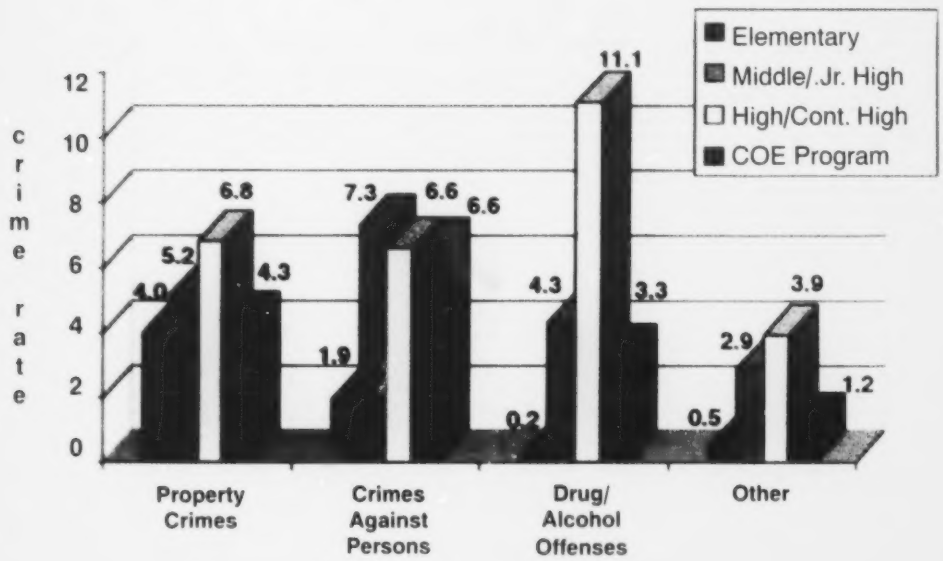
Crime rates are based on a statewide enrollment of 5,467,330 students.

Where do the incidents occur?

Chart 2 provides a breakdown of the crime rates by school level: elementary, middle/junior high, high school/continuation high school, and COE programs. The nature and incidence of crime varies according to the type of school level and is consistent with the behavior we would expect to see at each level. For example, at the elementary school level the lowest rate is for Drug and Alcohol Offenses while the highest is for Property Crimes.

Chart 2

Incident Rates per 1,000 Students Enrolled in California Public Schools for the 1995-96 School Year (by school level)



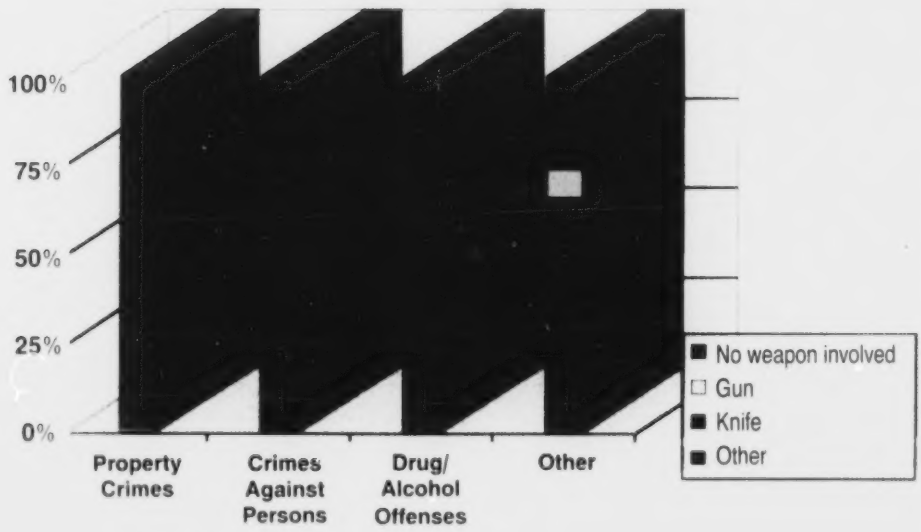
Crime rates are based on enrollment figures as defined by the Educational Demographics Unit of CDE

For each reported incident, site reporters were asked to document whether drugs or alcohol were involved. In 1995-96, data reveal that drugs or alcohol were involved in 27 percent of all incidents occurring on school campuses. However, 96 percent of those incidents were specifically Drug and Alcohol Offenses. Drugs or alcohol were involved in only one percent of non-drug and alcohol incidents such as Crimes Against Persons and Property Crimes. Overall, high school campuses have the highest incident rate of Drug and Alcohol Offenses with 11.1 incidents per 1,000 students occurring on these campuses.

CDE is interested in documenting the degree to which weapons were involved in school crime. For each incident of crime, school site administrators were asked the following question: ***"Was a weapon involved in the incident? If yes, check the type of weapon used: Knife, Gun, Other."*** Chart 3 displays the results of this question for the four primary crime categories.

Chart 3

Types of Weapons Involved in Incidents of Crime on California Public School Campuses for the 1995-96 School Year

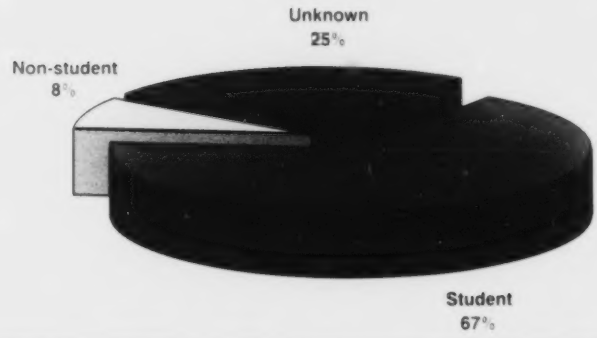


Overall, 14 percent (9,688) of the incidents reported to CSSA involved a weapon. Of these weapons, 5,453 were knives, 1,039 were guns, and 3,196 were classified as other types of weapons. The incident classification Other indicates the highest percentage of weapon involvement (70 percent) because this classification includes the crime category *Possession of a Weapon*. In the Crimes Against Persons category, 11 percent involved the use of a weapon which is consistent with the findings presented in Table 1. Table 1 shows that the most common incident in the Crimes Against Persons category is *Battery* which by definition does not involve a weapon.

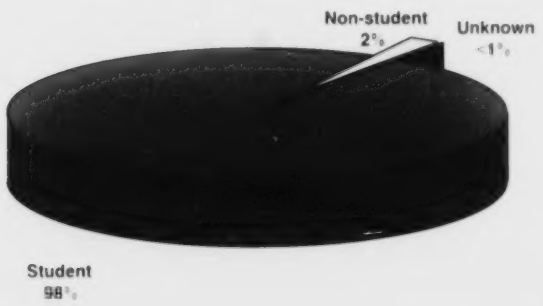
Most known suspects involved in incidents of school crime were male (61 percent) with females making up 14 percent. Although the suspect's gender was unknown in 25 percent of the reported incidents (primarily unwitnessed property crimes), males typically were more involved in school incidents than females. Known suspects were most commonly students of the school reporting the incident. Chart 4 provides a breakdown of the classification of the persons involved in incidents of school crime.

Chart 4

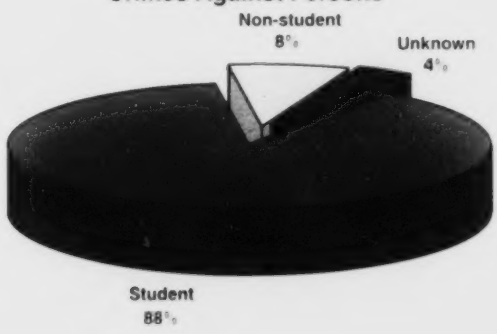
Classification of Suspects Involved in Incidents on California Public School Campuses for the 1995-96 School Year



Drug/Alcohol Offenses

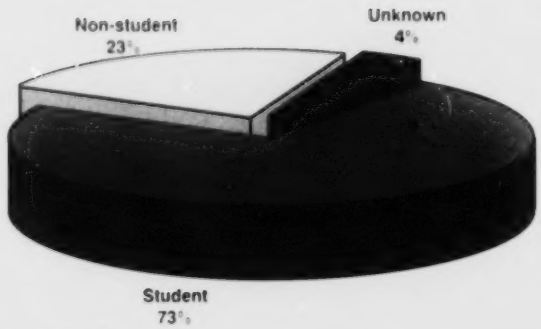


Crimes Against Persons



Property Crimes

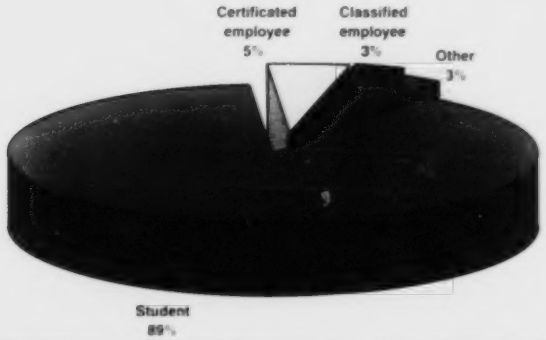
Other



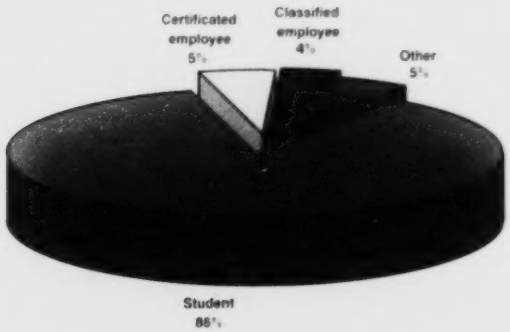
For Crimes Against Persons, site reporters provided a description of the victim(s). The description was limited to the gender and classification (certificated employee, classified employee, student, or other) of the victim. As with the suspects involved in the incidents, most victims were male (69 percent). Chart 5 provides a breakdown of the classification of victims of Crimes Against Persons. The ratio of student to adult victims mirrors the proportion of students and adults in California schools.

Chart 5

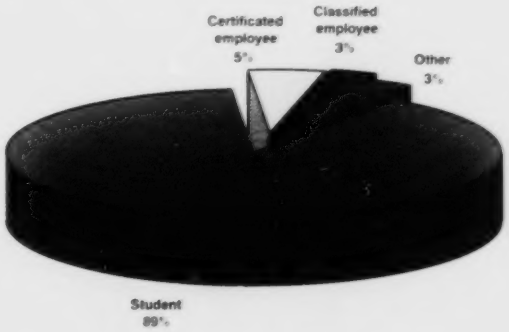
Classification of Victims Involved in Crimes Against Persons on California Public School Campuses for the 1995-96 School Year



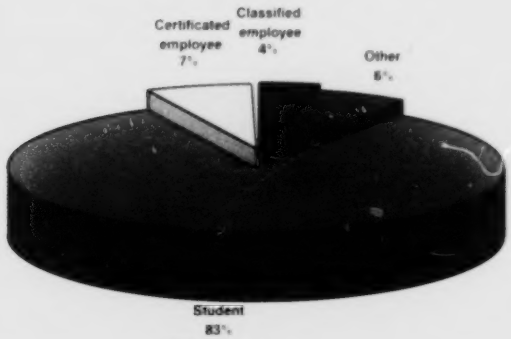
Assault with a Deadly Weapon



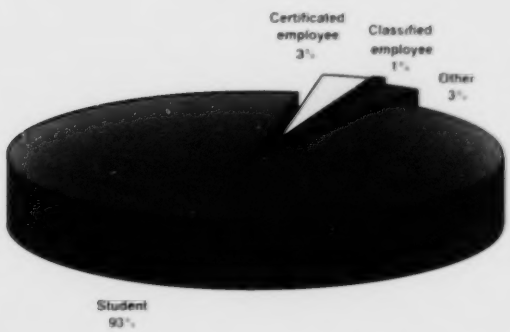
Battery



Robbery/Extortion



Sex Offense(s)



What about Challenge Districts?

Fifty-six districts throughout California have adopted State Superintendent of Public Instruction Delaine Eastin's Challenge District reform initiative. These school districts have committed to set high standards, adopt clear accountability measures, and build partnerships.

School safety is a key component to a supportive learning environment and is one of the 10 elements of the Challenge. Through a supportive learning environment, student achievement is fostered, and rigorous standards can be attained. Inherent in their involvement, Challenge Districts have adopted safe school policy statements and plans that:

- ensure schools provide a safe, secure teaching and learning environment that addresses prevention and intervention strategies,
- establish and maintain interagency and community partnerships,
- convene district and school committees to support safety of students and staff,
- develop a comprehensive safe schools plan,
- address staff development emphasizing safe school strategies,
- assess campus safety status regularly and evaluate the effectiveness of the plan, and
- promote maintenance of facilities to ensure student and staff safety.

Challenge school districts are in the process of implementing their safe schools components. Future year CSSA data will allow separate analysis of districts that have implemented these Challenge school safety elements.

How are crimes reported to the state?

The CSSA reporting process is premised on the reporting of individual incidents of school crime as soon as possible after the crime occurs. All school sites use a common instrument, the School Crime Reporting Form, to document each incident. This one-page form was developed by the CSSA Management Team and Advisory Committee following a thorough review of existing school crime reporting systems. State regulations provide the legal definitions for all of the elements of the School Crime Reporting Form (see Appendix A).

Each school district or COE has a designated CSSA representative who serves as a liaison between the school reporters and CSSA. Representatives are offered training and provided with materials to help them establish a consistent and reliable reporting process at each of their school sites.

Using this process, each individual school site designates a site reporter who is responsible for completing the form for each incident. On a monthly basis, the school site reporter reviews the completed forms for accuracy and then transmits them to the district CSSA representative who then has the option of sending the individual forms to CSSA or completing a Summary Report of the data. In 1995-96, 46 percent of the districts and COEs elected to summarize their data, and 54 percent bundled and shipped their incident forms for summary by CSSA.

What training is offered to LEAs?

The CSSA Management Team, Advisory Committee, and staff developed, field tested, and presented three types of training sessions to LEAs during the 1995-96 school year. The basic training program instructs CSSA representatives and school site reporters on the "Why, What, and How" of reporting school crime. Teams of educators and law enforcement personnel trained 2,442 participants at 80 sites before commencement of the first reporting period, then trained an additional 300 participants at six sites during the 1995-96 school year. A training team that represented education and law enforcement also conducted a Training of Trainers inservice at each of the 1995-96 training sites for 80 district and COE personnel to train and support site and program reporters and to establish effective and reliable reporting systems. Field tests of training and materials for electronic crime reporting processes and systems were provided at 50 sites around the state.

The CSSA Management Team, Advisory Committee, and staff also prepared the accompanying training materials which include the following: the CSSA manual, *Understanding and Reporting School Crime;* a video, "Why Report School Crime," featuring perspectives of State Superintendent of Public Instruction Delaine Eastin and Attorney General Dan Lungren; and an inservice kit containing forms, handouts, overheads, and the video. All school districts and COEs received the CSSA manual, and over 400 LEAs received the inservice kit.

What technical assistance is offered to LEAs?

Technical assistance from CSSA supports the accurate recording and transmittal of data and responds to questions and requests regarding reporting forms and processes, crime categories, and other program information. A toll-free technical assistance line operates daily, 8:30 a.m. to 4:30 p.m. (800-273-6363). Technicians responded to over 3,500 calls in 1995-96. A quarterly newsletter, *The CSSA Update*, disseminates current information, issues, success stories, and common questions and answers to CSSA representatives. The CSSA home page (http://www.cisnet.net/cssa) provides program information, a clearinghouse of model crime prevention and safety promotion programs, and information about potential local, state, and federal resources.

How accurate are the data?

To determine whether the CSSA system was accurate and reliable, and to gather information to improve the statewide system of reporting, CSSA staff developed an integrated validation system composed of three primary strategies. First, the CSSA Management Team and staff provided quality control to assure that all submitted crime forms are complete and internally consistent. Second, CSSA staff conducted a telephone survey of site reporters and designated CSSA representatives to assess whether LEAs had adopted the recommended CSSA administrative procedures. Finally, CSSA staff visited a random sample of school districts, COEs, and school sites. These visits provided an opportunity to assess the implementation strategies of school staff in completing the School Crime Reporting Form, and to cross-check the CSSA data with other internal records about similar crimes.

Using the information gathered through this validation system during the 1995-96 school year, CSSA staff reached the following conclusions:

- While many of the 114 school site reporters and CSSA representatives participating in the telephone survey appeared to have adopted the recommended CSSA administrative procedures, a significant number were not adequately implementing other recommended procedures such as the immediate completion of a CSSA form (most forms are completed within one week) and the distribution of the CSSA newsletter to school site reporters.

- Of the 47 LEAs and over 100 schools that participated in the more methodologically rigorous site visits, about fifty percent had reasonably strong reporting procedures in place. They met the minimum legislated CSSA standards, developed systems to verify the accuracy of their data, and often had CSSA data that were corroborated by their student suspension data. However, the remaining LEAs demonstrated evidence of underreporting crime data for two primary reasons. First, school site reporters sometimes forgot to file crime reports. These lapses could generally be corrected if the LEA had a quality control system in place, which many did not. Second, many reporters were hesitant to record the physical battery of one student by another, especially at the elementary school level where there was a pervasive attitude that these crimes were not serious enough to report.

- The highest level of accuracy in CSSA reporting was found among those LEAs whose CSSA representatives had developed a consistent and reliable system of communication with school site reporters.

- There were many different local approaches to CSSA reporting. Analyzing these approaches has been helpful in developing a set of best practices for CSSA representatives and school site reporters to help further increase the accuracy of CSSA reporting in 1996-97.

The practical limitations of the validation visits — primarily the cost constraints of visiting a representative sample of LEAs — make it impossible to develop an estimate of how many and which LEAs are reporting accurately and verifying their crime incidents with school suspension data, and how many and which LEAs are underreporting their crime data in the first year. Therefore, while evidence exists that some LEAs underreported school crime data, the findings from the validation cannot be statistically generalized to the statewide data.

Caution should be exercised in the use of the data contained herein and in making any comparison of one LEA to another. Aside from the obvious differences which would be expected in the communities (i.e., surrounding neighborhoods, police effectiveness, and other criteria), various districts may have been differentially effective in reporting crime during this first year of the CSSA program.

CONCLUSIONS AND RECOMMENDATIONS

What can we conclude from these data?

This first year of data provides a snapshot of school safety in California. Without longitudinal data, CDE cannot measure the trends in the types or number of incidents. Similarly, first-year data does not allow CDE to measure the impact or effectiveness of the approaches that many innovative districts are implementing to address school safety. CDE looks forward to being able to analyze school safety trends, programs, and techniques in future annual reports.

As longitudinal CSSA data become available in future years, it will be possible to compare the effectiveness of the many safe schools grant programs in California. These data will help all state policy makers determine budget priorities as additional funding becomes available.

Are there legislative implications?

Accurate and reliable data are critical to CSSA. Validation visits to schools, districts, and COEs demonstrate the importance of suspension data to verify that the data being reported by LEAs are complete and accurate. Differences in the manner suspensions are categorized as compared to CSSA crime categories can make it difficult to ensure that all incidents are reported under CSSA. Legislation may be necessary to make changes in suspension definition categories (without impacting school board and administrator powers or creating increased workloads) to be able to tie data to CSSA incidents and ensure that these data are complete and accurate.

What are the future year impacts?

CDE believes that the accuracy of crime reporting will improve in the second year as school, district, and COE personnel improve their reporting systems and adjust to CSSA requirements. Plans to assure this improved accuracy include doubling the number of site visits in 1996-97. CSSA staff are also working to gather a statistically valid sample of suspension data from a large number of sites which should allow for an estimation of underreporting levels for certain school crimes across all LEAs. These strategies, combined with additional training opportunities and materials, and a continued commitment to immediate, high-quality technical assistance, should ensure an increasingly accurate assessment of crime levels in California schools for many years to come.

As CDE ties longitudinal data to approaches used by LEAs in future year reports, CDE will be able to provide concrete policy and funding recommendations about school safety and violence prevention programs.

CSSA QUICK REFERENCE GUIDE TO CRIME DEFINITIONS

Crime	Definition	Legal References
Arson	The willful and malicious setting fire to or burning any structure or property. Arson does not include one burning his or her own property, unless there is injury to another person or another person's property. Reporting for the purposes of the Safe Schools Assessment Program shall be limited to incidents of arson that result in an economic loss of $100 or more.	Penal Code sections 451,452.
Assault with a deadly weapon	The use of a firearm, deadly weapon, or instrument against another person. A deadly weapon can be a firearm; stun gun; bows and arrows; knives or other cutting instruments; clubs; bottles; explosives; and body parts, such as teeth, hands, fists, and feet.	Penal Code sections 244.5, 245, 245.5.
Battery	The willful and unlawful use of force or violence upon the person of another.	Penal Code sections 242, 243.2.
Burglary	Any entry with the intent to commit a theft or any felony, even though force may not have been used to gain entry. This also includes attempted burglary.	Penal Code Section 459.
Destructive/Explosive Devices	**Destructive devices** means any projectile containing any explosive or incendiary material or any chemical substance, bomb, facsimile bomb, grenade, explosive missile or similar device or any launching device; weapon of a caliber greater than .60 caliber which fires fixed ammunition or any ammunition other than a shotgun; rocket, rocket propelled projectile or similar device of diameter greater than .60 inches or launching device; breakable container which contains a flammable liquid with a flashpoint of 150 degrees Fahrenheit or less and has a wick or similar device capable of being ignited; and, any sealed device containing dry ice (C0 2) or other chemically reactive substances. **Explosive devices** means any substance, or combination of substances, the primary common purpose of which is detonation or rapid combustion. Explosives include, but are not limited to: dynamite, nitroglycerin, black powder, propellant explosives, detonation primers, blasting caps or commercial boosters; substances determined to be class A and class B explosives by the United States Department of Transportation; nitro carbo nitrate substances (blasting agent) as classified by the United States Department of Transportation; any material designated as an explosive by the State Fire Marshal; and, certain class C explosives designated by the United States Department of Transportation. Included in this category also are written or verbal threats to use destructive/explosive devices. *Devices such as snappers or poppers, firecrackers, and fireworks shall not be reported.*	Penal Code sections 148.1, 12301(a)(1), 12303.2, 12303.3, 2000. Health and Safety Code, Sections 12000, 12670-12692, 12680.
Drug and Alcohol Offenses	Drug and alcohol offenses mean the possession, use, sale or furnishing of any drug, alcohol, or intoxicating substance, as well as drug paraphernalia, that is prohibited by law. Crimes to be reported for the purposes of the Safe Schools Assessment Program under Drug and Alcohol Offenses include: Use of Alcohol/Drugs, Possession of Alcohol, Possession of Drugs, Possession of Paraphernalia, Possession for Sale of Drugs/Alcohol, Sale and/or Furnishing of Drugs /Alcohol.	Penal Code sections 380, 381, 647 (f). Health and Safety Code sections 11014.5, 11018, 11019, 11054-11058, 11350-11361, 11364, 11364.7, 11550, 11680, 11681. Business and Professional Code Section 25608.

CSSA QUICK REFERENCE GUIDE TO CRIME DEFINITIONS

Crime	Definition	Legal References
Graffiti	Graffiti means any form of unauthorized painting, writing, or inscription on the property of a school district or county office of education, regardless of the content or nature of the material used in the commission of the act. Reporting for the purposes of the Safe Schools Assessment Program shall be limited to incidents of graffiti that result in an economic loss of $100 or more.	Penal Code Section 640.5.
Homicide	The unlawful killing of a person by another person.	Penal Code sections 187, 192.
Loitering/Trespassing	**Loitering** is to delay, to linger, or to idle about any school or public place without lawful business for being present. **Trespassing** refers to the entry on school grounds during school hours without registering with the site or program administrator, as required by law, and remaining after being asked to leave, or returning to the school grounds within seven days of being asked to leave.	Penal Code sections 602(n), 602(p), 626.8, 627, 653g.
Possession of Weapon	The unauthorized possession of dangerous weapons, which include, but are not limited to, all kinds of guns, or knives.	Penal Code sections 244.5, 417, 626.9, 626.10, 653, 12020, 12051. Education Code Section 49300
Robbery/Extortion	**Robbery** means the taking of property in possession of another, from his person or immediate presence, and against his will, accompanied by force or fear. **Extortion** means a threat to take or the taking of property from another person without their consent. The extortion was induced by a threat of force or wrongful use of fear. Extortion may occur over a period of time.	Penal Code sections 71, 211, 212, 518, 519.
Sex Offenses	Sex offenses mean sexual battery, rape, statutory rape, sodomy, lewd and lascivious conduct with children, oral copulation, and child molestation.	Penal Code sections 243.4, 261, 261.5, 286, 288, 288a, 647.6.
Theft	Theft (larceny) is the taking, leading, driving, or carrying away of property (including motor vehicles) belonging to another with the intent to deprive the rightful owner of it's use, regardless of the value of the property. This description also includes attempted theft. Reporting for purposes of the Safe Schools Assessment Program shall be limited to incidents of theft that result in an economic loss of $50 or more.	Penal Code sections 484, 487, 487.3, 488.
Vandalism	The malicious defacing, damaging, or destroying of property to school, student, or employee property. For Safe Schools Assessment Program reporting purposes, please mark graffiti separately from vandalism. Reporting for purposes of the Safe Schools Assessment Program shall be limited to incidents of vandalism that result in an economic loss of $100 or more.	Penal Code Section 594.

Appendix B

California Department of Education
Safe Schools and Violence Prevention Office
Safe Schools Grant Programs, 1996-97

GRANT	AMOUNT OF FUNDING	PURPOSE	WHO'S ELIGIBLE	APPLICATIONS AVAILABLE	CONTACT
School Violence Reduction Grant Program	Approximately $7.2 M statewide in 1996-97, county entitlement per enrollment	To implement a variety of safe schools strategies based on local needs	County offices of education (will offer grants to schools and school districts)	January-March (contact county offices)	Karen Lowrey (916) 323-1027
Targeted Truancy and Public Safety Grant Program	$10 M for 8 or more sites (3 year demonstration grant)	To implement integrated interventions to prevent repeated truant and related behaviors	School districts and county offices of education	January	Linda Davis-Alldritt (916) 327-5930 Vivian Linfor (916) 323-1028 Chuck Nichols (916) 323-1026 Jean Scott (916) 323-5074
School Community Violence Prevention Grant Program	$50,000 each	To address local communities' own unique needs related to non-violence strategies	School districts and county offices of education	(No additional grants for fiscal year 1996-97)	Olin Jones, Attorney General's Office (916) 324-7863 Eloise Bradrick-Talk (CDE) (916) 324-6159 Vivian Linfor (916-323-1028
Conflict Resolution & Youth Mediation Grant Program	$8,000 each	To provide training to feeder school teams in conflict resolution	School districts	February-March	Karen Lowrey (916) 323-1027 Steve Jefferies, Attorney General's Office (916) 324-7863
Safe School Plan Implementation Grants	$5,000 each (plus district matching fund); 100 issued each year	To assist schools in implementing a portion of their Safe School Plan	Schools	August-October	Vivian Linfor (916) 323-1028 David Ryan (916) 323-1024
GRIP (Gang Risk Intervention Program)	$3 M statewide each year	To intervene and prevent gang violence	County offices of education (Grant award preference to existing programs.)	March-April	Chuck Nichols (916) 323-1026
Title IV (IASA) Safe & Drug Free Schools & Communities **(This is not a grant.)**	$4.03 per pupil (federal fund entitlement)	To initiate and maintain alcohol/drug/tobacco and violence prevention programs in schools	County offices of education and school districts receive entitlements	June and October	Karen Lowrey (916) 323-1027 Greg Wolfe, Healthy Kids Program Office (916) 657-3040

Ventura	# of incidents	124,253	622	867	13	0	11	33	160	584	182,007.00
	crime rate		5.01	6.98	0.10	—	0.09	0.27	1.29	4.70	1.46
Yolo	# of incidents	25,107	89	69	3	0	3	0	21	125	54,811.00
	crime rate		3.54	2.75	0.12	—	0.12	—	0.84	4.98	2.18
Yuba	# of incidents	13,564	38	60	1	0	5	7	19	39	14,624.00
	crime rate		2.80	4.42	0.07	—	0.37	0.52	1.40	2.88	1.08

Note: Due to space constraints, some crimes (Destructive/Explosive Device, Bomb Threat, Loitering/Trespassing) are not included in this table. These three categories comprise less than 5 percent of all school crime; Loitering/Trespassing represents 3 percent of the total crime.
Crime rates are not shown for Counties with enrollment of fewer than 1,000 students.
